

AGODA project for JIRA

Integration with Testomatic Test Runs

Author: Yevheniia Petrenko

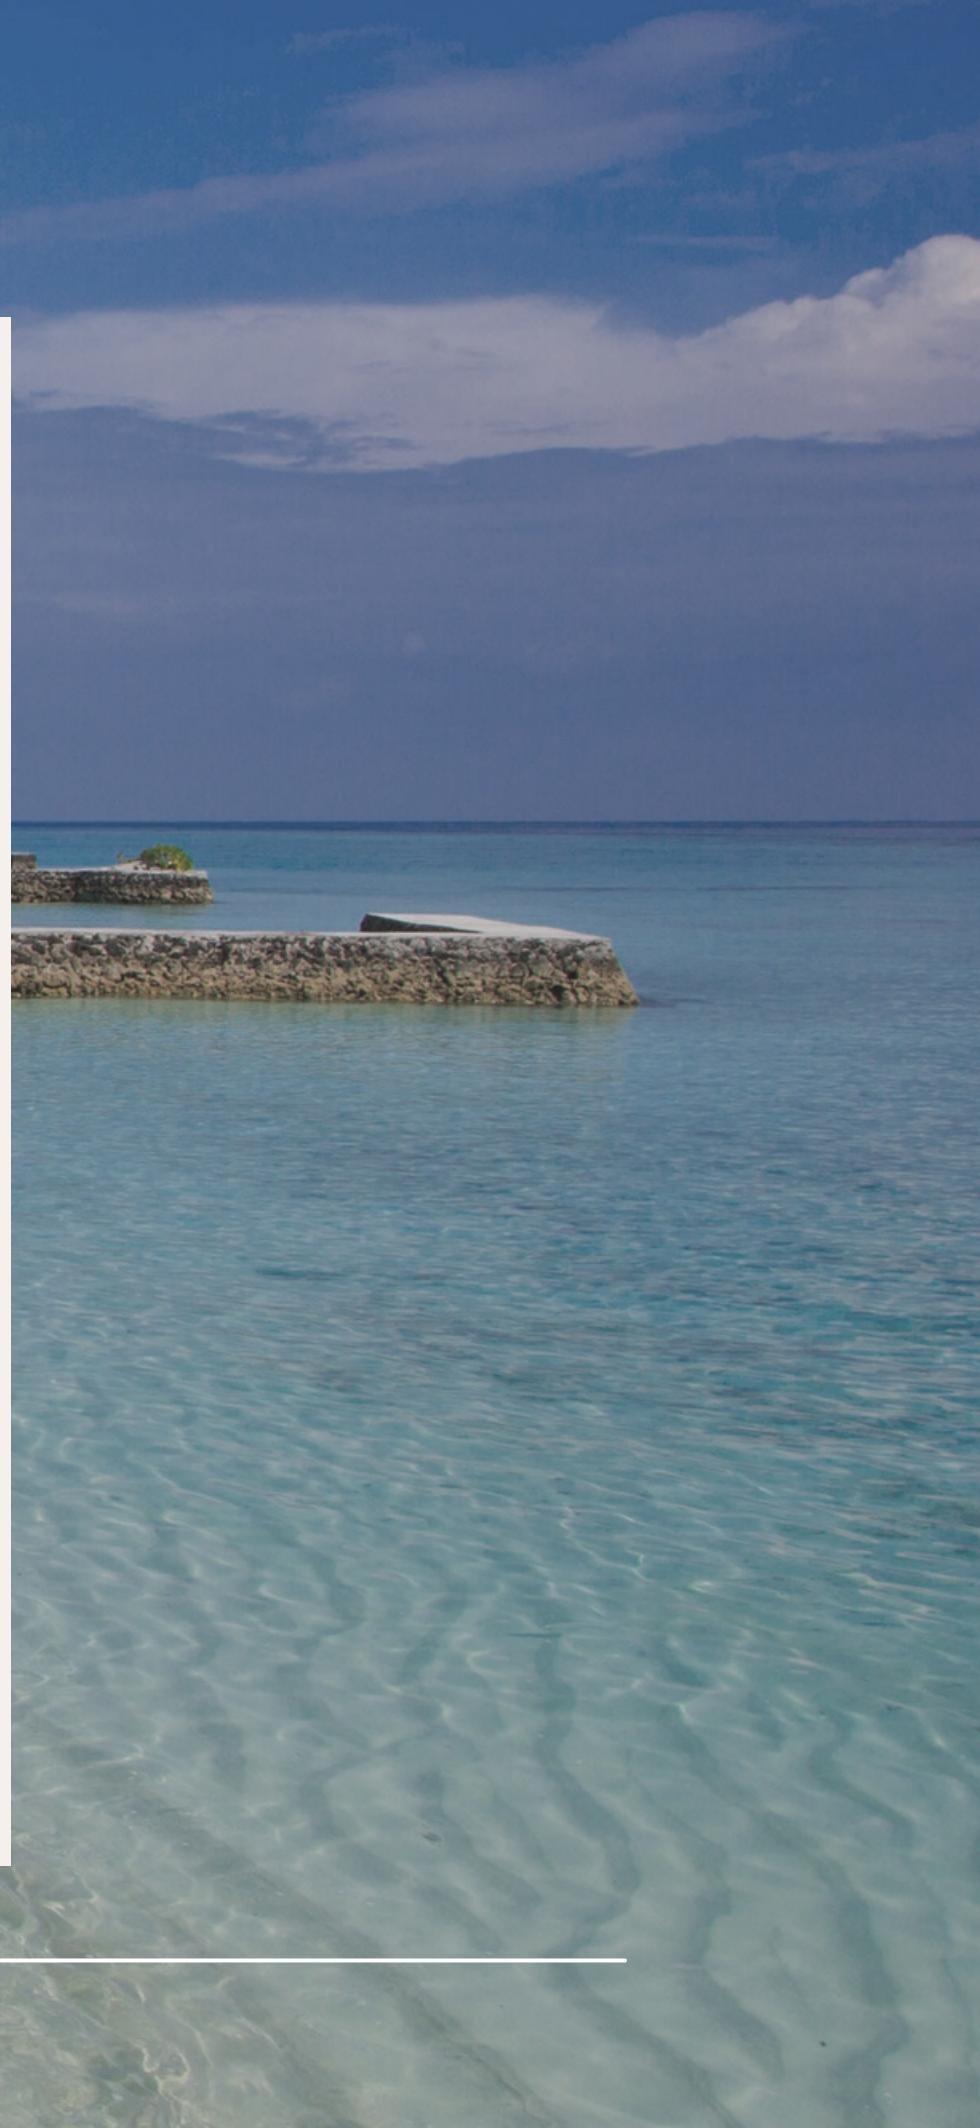

agoda

Online travel platform

AGODA Project

Agoda
<https://www.agoda.com/>
is an online travel platform
that brings high-value and rewarding
travel experiences to people
all over the world through the Agoda website.

AGODA project. Testomatio. Airport Transfer Search List of Tests

The screenshot shows the Testomatio interface for the AGODA website project. The left sidebar has a purple header with icons for checklist, play, list, chart, and network. The main area has a yellow header with the URL <app.testomat.io/projects/agoda-website-project/>. The title is "AGODA website project" with 173 tests. A search bar says "Search [Ctrl + K]" and a "New" button is visible. The test list starts with "Manual 173" (selected), followed by "Automated", "Out of sync", and "Detached". The tree view shows:

- Airport Transfer Search 173 tests Y
 - Searching Transfer To Airport (2) 41 tests Y @smoke
 - > Pick-up location Search field 7 tests Y
 - > Destination Airport Search field 11 tests Y
 - > Pick-up Date 7 tests Y
 - > Pick-up Hour 4 tests Y
 - > Passenger's Quantity 8 tests Y
 - > Multiple property search 4 tests Y
 - > Searching Transfer To Airport 132 tests Y

AGODA project. Testomatio. Airport Transfer Search List of Tests

The screenshot shows the Testomatio web application interface for the AGODA website project. The top navigation bar includes a back arrow, forward arrow, refresh button, and the URL <app.testomat.io/projects/agoda-website-project/suite/623c3941>. On the right of the header are various icons for file operations and a status indicator showing the suite is **Paused**.

The main content area is titled **AGODA website**. On the left, a sidebar displays a tree view of test cases under the **Manual 184** category. One node, **Pick-up location**, is expanded, showing several sub-tasks like "Verify the ability to search by the available country".

The main panel shows a test suite for **Airport Transfer Search > Searching Transfer To Airport (2) @smoke > Suite @S623c3941**. The suite has a status of **Y** (Yellow). It includes sections for **TESTS AND DESCRIPTION**, **RUNS**, and **HISTORY**. The **TESTS AND DESCRIPTION** section contains a **Pre-Requirements** step: "As a User, I want to effortlessly search for my preferred pick-up location when booking an airport transfer on Agoda's website." Below this is a **Tests (7)** section listing seven test cases, each with a manual status and a @smoke tag.

At the bottom of the main panel, there is a search bar with the placeholder "Add new test" and a "Create" button. A "Bulk" toggle switch is also present.

AGODA project. Testomatio. Airport Transfer Search List of Tests

The screenshot shows the Testomatio web application interface. The top navigation bar includes a back arrow, forward arrow, refresh button, and the URL <app.testomat.io/projects/agoda-website-project/suite/6f2255da>. On the right of the navigation bar are icons for file operations, a paused status, and a 'Relaunch to update' button.

The main content area has a header with a checkmark icon, the text 'AGODA website p', and a manual count of 'Manual 182'. To the right are buttons for 'Pick Emoji', 'New Test' (with a checkmark), 'Edit', and more options. A small circular icon with a 'Y' is also present.

The left sidebar features a vertical tree structure with icons for different test types. The visible branches include 'Airport Transfer Search' (selected), 'Searching Transfer', 'Pick-up location', 'Destination Airport Search' (selected), and several other items under 'Verify the ability' and 'Check the 'Clear' button'.

The main content area for the 'Destination Airport Search field' test case includes:

- Pre-Requirements:**
 - As a User, I want to easily search for airport transfers on Agoda.
 - As a User, I want a Destination Airport Search field to specify the airport for my transfer.
 - As a User, I want the Destination Airport Search field to provide auto-suggestions based on my input.
 - As a User, I want the option to manually enter the airport code or name in the Destination Airport Search field.
- Tests (11):**
 - Verify the ability to search by the available city manual
 - Verify the ability to search by the available country manual
 - Verify the capacity to search by the available airport manual
 - Verify the incapacity to search by an unavailable airport manual
 - Ensure that a search is not executed when the search field is empty manual
 - Verify the ability to search by country-city combination manual
 - Verify the ability to search by country-airport combination manual
 - Verify the ability to search by country-city-airport combination tests disabled

A bottom bar contains a text input field 'Add new test', a 'Create' button, and a 'Bulk' toggle switch.

AGODA project. Testomatio. Airport Transfer Search List of Tests

The screenshot shows the Testomatio application interface for the AGODA project. The top navigation bar includes a back arrow, forward arrow, refresh button, and the URL <app.testomatio.io/projects/agoda-website-project/suite/38daf421>. The top right features a toolbar with icons for file operations, a paused status, and a relaunch button.

The main content area is titled "AGODA website p" and shows a test structure:

- Manual 173** (checked)
- A [Esc]**
- Airport Transfer Search** (unchecked)
- Searching Transfer** (unchecked)
- Pick-up location** (unchecked)
- Verify the ability**
 - Verify the ability**
 - Verify the capacity**
 - Verify the ability**
 - Check the 'Clear'**
 - Input text with v**
 - Input valid text i**
- Destination Airp** (unchecked)
- Verify the ability**
 - Verify the ability**
 - Verify the capac**
 - Verify the incap**
 - Ensure that a se**
 - Verify the ability**

The current test case is **Pick-up Date**.

TESTS AND DESCRIPTION

Pre-Requirements

As a User, I want...

- to easily find and book airport transfers on Agoda's website.
- flexibility in choosing the Pick-up Date that suits my travel itinerary.
- to see real-time availability for airport transfers on the selected Pick-up Date.
- to have the option to modify the Pick-up Date if my travel plans change.

Tests (7)

- Check if today's date is the default selection for the 'Pick-up date' manual @smoke
- Check the ability to select a different date from the date picker for the 'Pick-up date' manual @smoke
- Check that tomorrow's date can be selected as the 'Pick-up date' manual @smoke
- Check that the selection of a date 365 days from today is allowed as the 'Pick-up date' manual @smoke
- Check the inability to select yesterday's date for the 'Pick-up date' manual @smoke
- Check that choosing a date 366 days from today is not allowed as the 'Pick-up date' manual @smoke
- Check that the 'Pick-up date' remains visible and accessible across different screen sizes manual @smoke

Add new test **Create** **Bulk**

AGODA project. Testomatio. Airport Transfer Search List of Tests

The screenshot shows the Testomatio web application interface for the AGODA project. The top navigation bar includes a back arrow, forward arrow, refresh button, and the URL <app.testomat.io/projects/agoda-website-project/suite/99b8f064>. The top right features a toolbar with icons for file operations, a paused status, and a relaunch button.

The main content area is titled "AGODA website p" and shows a test suite structure:

- Manual 173 (checked)
- A [Esc]
- Airport Transfer Search (unchecked)
- Searching Transfer (unchecked)
- Pick-up location (unchecked)
- Destination Airp (unchecked)
- Pick-up Date (unchecked)
- Pick-up Hour (checked, highlighted in blue)
- Passenger's Qua (unchecked)
- Check that the d (unchecked)
- Verify the abili (unchecked)
- Check if there ar (unchecked)
- Verify the inabi (unchecked)
- Verify the abili (unchecked)
- Verify the abili (unchecked)

The "Pick-up Hour" test case details are as follows:

Pre-Requirements

As a User, I want...

- to easily find and select the Pick-up hour for my airport transfer.
- flexibility to modify the Pick-up hour if my travel plans change.
- to receive timely notifications and reminders about my Pick-up hour.
- a user-friendly interface that makes the Pick-up hour selection process intuitive.
- to have access to customer support in case of any issues with Pick-up hour selection.

Tests (4)

- Check that the default value for 'Pick-up Hour' is set to 12:00 PM manual @smoke
- Verify the ability to select morning hour (07:30 AM) manual @smoke
- Verify the ability to select day hour (02:15 PM) manual @smoke
- Verify the ability to select evening hour (08:45 PM) manual @smoke

At the bottom, there is a "Add new test" input field, a "Create" button, and a "Bulk" toggle switch.

AGODA project. Testomatio. Airport Transfer Search List of Tests

The screenshot shows the Testomatio web application interface. The top navigation bar includes icons for back, forward, refresh, and various browser functions, along with a status indicator "Paused" and a "Relaunch to update" button. The main header "AGODA website p" is partially visible on the left.

The main content area displays a test suite structure:

- Airport Transfer Search > Searching Transfer To Airport (2) @smoke > Suite @S4075e320** (checked)
- Passenger's Quantity** (checked)

Below the suite structure, there are three tabs: **TESTS AND DESCRIPTION** (selected), **RUNS**, and **HISTORY**.

Pre-Requirements:

As a User, I want the ability to specify the quantity of passengers when searching for airport transfers on Agoda's website.

Tests (8):

- Check that the default value for 'Passenger's Quantity' is set to 1 manual @smoke
- Check if there are increment and decrement buttons next to the 'Passenger's Quantity field and confirm that they function correctly, updating the quantity
- Verify the inability to select 0 passengers (less than minimum) manual @smoke
- Verify the ability to select 1 passenger manual @smoke
- Verify the ability to select 2 passengers manual @smoke
- Verify the ability to select 45 passengers manual @smoke
- Verify the inability to select 46 passengers (more than maximum) manual @smoke
- Check the ability for manual input of quantity of passengers in addition to using the widget manual @smoke

At the bottom of the tests list, there is a blue button labeled "Add new test" and a purple "Create" button.

AGODA project. Testomatio.

The screenshot shows the Testomatio web application interface. The top navigation bar includes a back arrow, forward arrow, refresh button, and the URL <app.testomat.io/projects/agoda-website-project/suite/9cc57a7f>. On the right of the bar are several icons: a gear, a star, a green circle, a blue square, a pink square, a blue wave, a download arrow, a speech bubble, a file icon, a magnifying glass, a play button, a pause button, and a yellow circle with a 'Y' labeled "Paused". To the right of the pause button is a "Relaunch to up" button.

The main header "AGODA website p" has a dropdown menu icon, a checkmark icon, and an "X" icon. Below the header is a sidebar with a vertical list of test categories: "Manual 173" (with a checked checkbox), "Airport Transfer Search" (unchecked), "Searching Transfer" (unchecked), "Pick-up location" (unchecked), "Destination Airport" (unchecked), "Pick-up Date" (unchecked), "Pick-up Hour" (unchecked), "Passenger's Qua" (unchecked), "Multiple proper" (unchecked), "Check the search" (unchecked), "Check the search" (unchecked), "Check the search" (unchecked), "Check that the s" (unchecked), and "Searching Transfer" (unchecked). A keyboard shortcut "[Esc]" is shown next to the "Multiple proper" item.

The main content area is titled "Multiple property search". It features three tabs: "TESTS AND DESCRIPTION" (selected), "RUNS", and "HISTORY". The "TESTS AND DESCRIPTION" tab contains a "Pre-Requirements" section with the following text: "As a User, I want the ability to perform multiple property searches when looking for airport transfer options on Agoda's website. This feature should streamline the process of finding the most convenient and suitable transfer services". Below this is a "Tests (4)" section with the following list:

- Check the search by filling in only the first search field manual @smoke
- Check the search by filling in only the second search field manual @smoke
- Check the search by filling in both search fields manual @smoke
- Check that the search is not performed when the search fields are empty manual @smoke

At the bottom of the content area is a "Create" button and a "Bulk" button. A "Add new test" input field is also present.

Airport Transfer Search Functionality

Attach Add a child issue Link issue ...

Description

As a user, I want to be able to search for airport transfer services on the Agoda website, ensuring accurate and reliable results.

- 1. Search Criteria:**
 - Given that I am on the Agoda website, when I navigate to the "Airport Transfer" section,
 - Then I should see a clear and intuitive search interface.
- 2. Location and Date Selection:**
 - Given the airport transfer search interface,
 - When I enter the pickup location and date/time details,
 - Then the system should validate and accept the input.
- 3. Search Results:**
 - Given valid search criteria,
 - When I initiate the search,
 - Then I should see a list of available airport transfer services with relevant details (e.g., service provider, vehicle type, price).
- 4. Filters and Sorting:**
 - Given the search results,
 - When I apply filters (e.g., price range, vehicle type),
 - Then the displayed results should dynamically update according to the selected filters.
- 5. View Details:**
 - Given the search results,
 - When I click on a specific airport transfer service,
 - Then I should be able to view detailed information about the service, including terms, cancellation policies, and user reviews.
- 6. Booking Process:**

Jira. Sprint 6 Testing. Epic 6.1 Functional Testing. User Story: Airport Transfer Search Functionality. QA Tasks

The screenshot shows a Jira interface with the following details:

- Project:** AGODA_website
- Epic:** AGO-261
- User Story:** AGO-345: Airport Transfer Search Functionality
- Tasks:** Seven QA tasks listed under AGO-345:
 - AGO-346: QA Tasks: Test Case Design. Create detailed test cases for Airport Transfer Search Functionality.
 - AGO-347: QA Tasks: Test Case Design. Cover positive and negative scenarios, including edge cases.
 - AGO-348: QA Tasks: Test Data Preparation: Prepare test data for Airport Transfer Search, including valid and invalid inputs.
 - AGO-349: QA Tasks: Functional Testing. Execute functional tests on Airport Transfer Search.
 - AGO-350: QA Tasks: Functional Testing. Verify search results for correctness and completeness.
 - AGO-351: QA Tasks: Functional Testing. Confirm that filters and sorting options work as expected.
- Testomatio Section:** Shows linked tests for the AGODA website project, categorized by ID, Title, Type, Status, and Priority. The linked tests are:
 - ce53625e: Check that the search is not performed when the s manual
 - d13b1685: Check the search by filling in both search fields @s manual
 - f2e36234: Check the search by filling in only the first search f manual
 - 62c0cb87: Check the search by filling in only the second searc manual

Jira Integration with Testomatio

The screenshot shows a web application window titled "Jira project - AGO". On the left, there's a vertical sidebar with various icons. The main area is titled "Jira Integration" and contains the following fields:

- Email (Cloud) or Username (On Premise): `yevheniia2222+w@gmail.com`
- API Token (Cloud) or Password (On Premise): `.....` (redacted)
- Jira URL: `https://testmarathon2023.atlassian.net`
Example: `https://testomatio.atlassian.net`
- Project ID: `AGO`
Jira Project ID. Example: TES
- Context Path (If needed for Jira On Premise): `/jira`
For Jira On Premise. Example: `/jira`

At the bottom, there are "Save" and "Cancel" buttons, along with "Install Webhook" and "Test Connection" buttons.

At the very top of the browser window, the address bar shows `app.testomatio.io/projects/agoda-website-project/settings/jira/b908acc3/`, and the status bar indicates "Paused" and "Relaunch to update".

Testomatio. Creating Test Plan

The screenshot displays the Testomatio web application interface against a scenic background of palm trees and a blue sky.

Top Bar: Shows the URL `app.testomat.io/projects/agoda-website-project/runs/new`, browser icons, and a status bar indicating "Paused".

Left Sidebar: Contains navigation icons for Runs, Manual, Automated, and Runs Archive (5 runs).

Central Area - Manual Run Creation:

- Title:** New Manual Run
- Run Type:** Manual
- Run As Checklist:** All test descriptions will be hidden
- Edit Test Plan:** Title: "Test Plan for Searching Transfer to Airport Smoke". A "Save" button is visible.
- Runs Archive:** 41 tests matched, 5 runs.

Bottom Area - Detailed Test Plan View:

- Test Plan Structure:**
 - Airport Transfer Search (173 tests)
 - Searching Transfer To Airport (2) (41 tests) @smoke
 - Verify the ability to search by the available country (manual) @smoke
 - Verify the ability to search by the available city (manual) @smoke
 - Verify the capacity to search by the available airport (manual) @smoke
 - Verify the ability to search by country-city combination (manual) @smoke
 - Check the 'Clear' or 'Reset' functionality within the 'Pick-up location' search field to ensure it clears the selected current field (manual) @smoke
 - Input text with valid characters and review the search results (manual) @smoke
 - Input valid text in capital characters only and check the search results (manual) @smoke
 - Destination Airport Search field (11 tests)
 - Verify the ability to search by the available city (manual) @smoke
 - Destination Airport Search field (11 tests)
 - Verify the ability to search by the available city (manual) @smoke
 - Pick-up Date (7 tests)
 - Check if today's date is the default selection for the 'Pick-up date' (manual) @smoke
 - Check the ability to select a different date from the date picker for the 'Pick-up date' (manual) @smoke
 - Check that tomorrow's date can be selected as the 'Pick-up date' (manual) @smoke
 - Check that the selection of a date 365 days from today is allowed as the 'Pick-up date' (manual) @smoke
 - Check the inability to select yesterday's date for the 'Pick-up date' (manual) @smoke
 - Check that choosing a date 366 days from today is not allowed as the 'Pick-up date' (manual) @smoke
 - Check that the 'Pick-up date' remains visible and accessible across different screen sizes (manual) @smoke
 - Pick-up Hour (4 tests)

Jira. Selecting Tests to Run

The screenshot shows the Jira Testomatio interface for the AGO-261 issue. The 'Issues' tab is selected in the sidebar. A modal window titled 'Select tests to run' is open, listing 20 test cases. Each test case has a checkbox and a 'manual' status indicator. A 'Run Automated as Manual' toggle switch is at the top right of the modal. At the bottom of the modal are buttons for 'Select all', 'Advanced settings', 'Create Run', and 'Cancel'.

Testomatio. Test Report Result

Jira. Bug reports after Test Run

The screenshot shows a Jira interface for a bug report. The URL in the address bar is testmarathon2023.atlassian.net/browse/AGO-352. The page title is "Inability to Search Transfer Airport by Country Name on Agoda". The left sidebar shows the project "AGODA_website" (Software project) and various navigation options like "Issues" (which is selected), "Add view", "Code", "Project pages", "Tests Coverage", "Sprints Coverage", "Add shortcut", and "Project settings". The main content area displays the issue details, including environment information (Browsers: Google Chrome Version 119.0.6045.160, Firefox Version 119), device information (Device: Windows 10), and the steps to reproduce (STR). The STR lists four steps: 1. Open the Agoda website in Google Chrome. 2. Click on the Transfer Airport functionality. 3. Attempt to search for transfer options by entering the name of a country (for. ex. Ukraine) 4. Observe that the search results do not reflect relevant transfer options for the specified country. Below the STR, there is an "Expected result" stating that users should be able to search for transfer options by entering the name of a country in the Transfer Airport functionality. The "Actual result" states that the Transfer Airport functionality only allows searching for specific airports; entering a country name does not provide relevant transfer options. At the bottom, there are "Attachments (2)" showing two screenshots of the Agoda website, and a "Comments" section with a placeholder "Add a comment...".

Insufficient Destination Options for Transfer Airport Functionality

Attach Add a child issue Link issue ...

Description
Environment:
Browsers:
Google Chrome Version 119.0.6045.160
Firefox Version 119
Device: Windows 10

STR:

1. Open the Agoda website in Google Chrome.
2. Navigate to the Transfer Airport section.
3. Attempt to enter the destination, and observe the limited options in the drop-down list.
4. Try to enter a specific street name to determine if the system allows or rejects the entry.

Expected result: The Transfer Airport destination options should include streets to facilitate accurate and specific selections, allowing users to choose destinations beyond just country and city names.

Actual result: The drop-down list for Transfer Airport destinations is insufficient and does not provide street-level options, making it challenging to accurately select certain destinations.

Date Validation Issue in Transfer Airport Functionality

Attach Add a child issue Link issue ...

Description
Environment:
Browsers:
Google Chrome Version 119.0.6045.160
Firefox Version 119
Device: Windows 10

STR:
1. Open the Agoda website in Google Chrome.
2. Navigate to the Transfer Airport Functionality.
3. Attempt to select a date for the transfer, specifically choosing yesterday's date.

Expected result: The date selection field in the Transfer Airport Functionality should dynamically validate and prevent the selection of past dates, such as yesterday's date.

Actual result: Yesterday's date is selectable in the Transfer Airport Functionality, indicating a lack of dynamic validation for date selection.

Projects / AGODA_website / AGO-261 / AGO-355

Inability to Manually Enter Number of Passengers in Transfer Airport Functionality

Attach Add a child issue Link issue ...

Description

Environment:

Browsers:

Google Chrome Version 119.0.6045.160

Firefox Version 119

Device: Windows 10

STR:

1. Open the Agoda website in Google Chrome.
2. Navigate to the Transfer Airport search functionality.
3. Attempt to find a transfer service and notice the absence of a manual input option for the number of passengers.
4. Try to manually enter the number of passengers using the keyboard or any input method.

Expected result: Users should be able to manually enter the number of passengers for airport transfer services.

Actual result: There is no option to manually input the number of passengers; only the increase and decrease buttons are available, limiting user flexibility.

Description

Normal text B I ... A

Environment:

Browsers:
Google Chrome Version 119.0.6045.160
Firefox Version 119
Device: Windows 10

STR:

1. Open the Agoda website in Google Chrome.
2. Navigate to the Transfer Airport search section.
3. Fill in the transfer search form with relevant data.
4. Note the absence of a "Clear Data" button.
5. Attempt to clear the data using only the mouse and keyboard.

Expected result: A "Clear Data" button should be present within the transfer search form, allowing users to easily reset the form to its default state.

Actual result: There is no "Clear Data" button in the transfer search form
